TVA Internship Opportunities For Graduate Students 2026

Description

Our diverse range of internship opportunities allows you to explore various specialties within TVA, including:

- **Power Generation & Engineering:** Assist with nuclear operations, renewable energy development, transmission maintenance, or project management.
- **Environment & Sustainability:** Support environmental research, resource management, compliance initiatives, or sustainability programs.
- **Research & Innovation:** Contribute to cutting-edge research projects exploring new technologies, smart grid solutions, and carbon reduction strategies.
- **Finance & Business Operations:** Gain exposure to financial analysis, risk management, data analytics, or strategic planning within the energy sector.

Responsibilities

Depending on your chosen placement, your responsibilities might include:

- Conducting research and data analysis relevant to your field.
- Assisting with project planning, development, and implementation.
- Contributing to reports, presentations, and other communication materials.
- Participating in meetings, site visits, and field investigations.
- Learning and applying specific industry tools and technologies.

Qualifications

- Currently enrolled in a graduate program related to engineering, environmental science, energy, business, communications, or a relevant field.
- U.S. citizen or lawful permanent resident.
- Minimum GPA of 3.0.
- Strong communication, interpersonal, and analytical skills.
- Ability to work independently and as part of a team.
- Proficient in Microsoft Office Suite and relevant software tools (may vary depending on placement).

Experience

- Previous internships, research projects, or relevant coursework a plus.
- Demonstrated interest in the energy sector and TVA’s mission is preferred.

Skills

- Excellent problem-solving and critical thinking skills.
- Strong research and data analysis capabilities.
- Ability to learn new concepts and adapt to a fast-paced environment.
